

TECHSPRAY®

Precision Cleaning Technologies
for the Electronics Industry

PRODUCTION SUPPLIES

Conformal Coatings

RoHS Compliant 

Protect printed circuit boards (PCB) with Techspray conformal coatings. Coating can either be sprayed and brushed, or boards can be dipped directly into the conformal coating for a thick layer of protection.

- Designed to Protect PCB's
- Can Be Removed for Rework or Repair
- Contain Opti/Scan for UV Inspection

2102 FINE-L-KOTE SR

Silicone Conformal Coating

- UL recognized
- Thermal resistance — to 200°C
- Dielectric strength — 1100 volts/mil
- Moisture resistant
- Chemically resistant
- Vibration resistant — flexible
- IPC-CC-830 & MIL-I-64058C approved

2102-12S 463 mL aerosol
2102-G 3.8 L in metal pail

2108 TURBO-COAT

Acrylic Conformal Coating

- Fastest thermal cure
- Faster throughput without capital investment
- Thick coating — one-pass application
- Fast & easy rework & repair
- Thermal resistance — 125°C
- Dielectric strength — 1000 volts/mil
- IPC-CC-830 & MIL-I-64058C approved
- UL94 V-0 rated

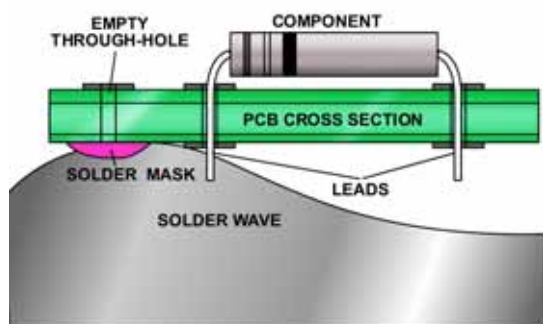

2108-12S 280 mL aerosol
2108-G 3.8 L in metal pail

Temporary Solder Mask

Prevent soldering protected areas in a wave soldering process by applying WonderMASK®. Designed to apply smoothly, dry quickly, withstand high, lead-free process temperatures, and then be removed easily.

- Can Be Cured in Pre-Heat
- Great for Lead-Free and Tin/Lead Solders
- All WonderMASK effective in lead and lead-free processes

2218 WONDERMASK PL

Natural latex peelable solder mask with fastest cure time.

- Fastest full cure
- Easily peelable
- Highest strength to avoid breakage
- Non-flammable

2218-8SQ 237 mL squeeze bottle
2218-G 3.8 L in plastic jug

2211 WONDERMASK P

Techspray's original synthetic latex peelable solder mask.

- Easily peelable
- Low odor
- Cure indicator – darkens as it cures
- Compatible with gold and copper leads
- Non-corrosive
- Non-flammable
- Long shelf-life

2211-8SQ 237 mL squeeze bottle
2211-G 3.8 L in plastic pail
2211-54G 204 L in plastic drum
